ECONOMY

Macroeconomic Stability

- Enduring a **prudent monetary policy** that will allow the gradual deceleration of inflation and reach a **budget balance**.
- Maintaining a **competitive and floating exchange rate**.
- Continuing with the searching of international **investments** for the country, at the time that a budget reform is carried out to **reduce tax pressure**.

Economic development

- Boosting the growth of the economy and production – in particular, of the **industrial activity** – as a starting point for the generation of employment and the recovery of the purchase power of wages and pensions.
- Generating a **foreign exchange surplus** to face the external debt maturities of the coming years.
- **Protecting the domestic industry** at expense of foreign imports.

Integral Development Project

- Redefining the economic program to **step back from the adjustment policy** and expand the potentiality of the human and natural resources of the country.
- Generating conditions to promote **productive investment**.
- Strengthening the internal market and improving the foreign commerce.
- Reactivating the economy through the creation of **incentives for SMEs**.

INTERNATIONAL INSERTION

Smart insertion

- Considering the international insertion as an opportunity,
- Looking forward to concrete the **entry to the OECD** and reach free trade agreements with other blocks or states, similar to the one reached with the European Union.
- **Accelerating the world insertion** increasing exports.
- Giving the productive sector more **competitive tools** to be more dynamic internationally.

Import substitution

- Integrating Argentina to the world with a pragmatic look that meets the **interests of the local industry and workers**.
- Implementing productive development policies that prioritize projects that generates an increase in exports and substitutes imports in a genuine way.
- **Promoting effective currency savings** and implementation of new productive and technological practices.

Articulate with national interest

- Finding a middle zone between "indiscriminate openness" and "isolationism".
- Promoting a National **strategy that articulates the National interest** and defense of Argentine production and **international culturalism**.

EMPLOYMENT

Modern Labor Legislation

- Generating a **modern labor legislation** to facilitate the creation of formal jobs and prepare the country for the global technological changes.
- **Lowering labor taxes and reducing extra-salary costs** to increase competitiveness.

A reform is not necessary

- **Re- Introducing the National Ministry of Labor, Employment and Social Security**,
- Reconstituting the real salary in a dialogue space, promoting the Council of the Minimum Vital and Mobile Salary.
- Endorsing the reactivation of consumption and productivity. A **labor reform would not be a priority**

Reform when economy improve

- Carrying out a labor reform only once the economy is underway, within the framework of a **new development process**.
- Discouraging a labor reform. The reform should not touch the acquired rights and would be focused on **generating more employment**
